### **DETAILED ACTION**

## Drawings

The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the "protective portions have a circular shape" (claim 13, lines 1-2; claim 29, lines 1-2) must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

#### **Abstract**

Applicant is reminded of the proper language and format for an abstract of the disclosure.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc. Specifically, the phrase "The present invention is" in line 1 is considered improper. Additionally the use of the phrase "etc." in line 2, is also considered improper. Appropriate correction is required.

# Claim Objections

Claims 3-5, 12, and 18-20 objected to because of the following informalities: the use of the word "about" in these claims is considered to be vague and indefinite as one of ordinary skill in the art would be unable to ascertain the requisite scope of the invention. It is recommended that applicant change the word "about" to --substantially-in order to clarify the claim. Appropriate correction is required.

Regarding claim 13, the phrase "or a shape that is a combination thereof" renders the claim(s) indefinite because the claim(s) include(s) elements not actually disclosed (those encompassed by " or a shape that is a combination thereof "), thereby rendering the scope of the claim(s) unascertainable. See MPEP § 2173.05(d).

The numbering of claims is not in accordance with 37 CFR 1.126 which requires the original numbering of the claims to be preserved throughout the prosecution. When claims are canceled, the remaining claims must not be renumbered. When new claims are presented, they must be numbered consecutively beginning with the number next following the highest numbered claims previously presented (whether entered or not).

Misnumbered claim 33 been renumbered 39. (It is noted that there are two number "33" claims present).

# Allowable Subject Matter

Claims 1-22 and 26-39 are allowed.

#### Conclusion

This application is in condition for allowance except for the following formal matters:

See the Drawing/Abstract/Claim Objections as advanced above.

Prosecution on the merits is closed in accordance with the practice under Exparte Quayle, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
